

Calvin Lee Chun Hui

Aspiring Application Developer | FinTech Solutions, Product Design & Data

Phone: 98889813 | Email: Creativecalvinlee31@gmail.com | LinkedIn: <https://www.linkedin.com/in/lee-calvin-9b837431/> | Portfolio Website: <https://calvin-portfolio-nine.vercel.app/>

I am a Business and Financial Technology diploma student who enjoys building fintech applications end to end – from coding the logic to designing the interface. I work across Python, web technologies and modern app frameworks, supported by a product mindset shaped by hands-on UX design and data analytics. I like turning complex financial features into clear, usable products, and I increasingly build with AI tools to work faster and deliver more. I am eager to learn, take ownership and create real value for clients and users as part of a fast-moving, technology-led team.

EDUCATION

Nanyang Polytechnic

April 2024 to Present

- Diploma in Business and Financial Technology
- Director List: Year 1 Semester 1
- Date of graduation: April 2027

Admiralty Secondary School

Jan 2020 to Oct 2023

- Robotics Club President
- O levels net score: 13

KEY SKILLS

- Programming & Development: Python | C/C++/C# | JavaScript | HTML | CSS | Solidity | Object-Oriented Programming
- Frameworks, Databases & Tools: Angular | Ionic | Firebase / Firestore | Git / GitHub | UiPath (RPA)
- Data & Analytics: Data Cleaning & Preparation | Visualization & Dashboards (Tableau) | Trend & Correlation Analysis
- Design & Prototyping: Figma | Canva | Fusion 360 | Tinkercad | 3D Printing
- Soft Skills: Problem Solving | Critical Thinking | Leadership | Teamwork | Ownership | Attention to Detail

PERSONAL/SCHOOL PROJECTS

Vintage E-Business Web Application

Nov 2025 to Feb 2026

Full-Stack Developer & System Integrator

- Built a full e-business web application unifying resale, retail and tailoring for the budget fashion market, using C#, ASP.NET Web Forms and SQL on an MVC architecture
- Developed customer authentication and an admin analytics dashboard, and self-learned OTP/SMTP email verification beyond the syllabus for a secure Forgot Password feature
- Served as system integrator, merging all teammates' modules into one working, database-driven platform

RoboChain - Decentralised IP Ledger

Nov 2025 to Feb 2026

Blockchain Developer

- Built a decentralised application (dApp) for robotics centres, writing smart contracts in Solidity for design registration, certification, transfer and achievement records
- Integrated the contracts with a web interface (JavaScript, HTML, CSS) and IPFS storage, tested on the Sepolia testnet via MetaMask
- Delivered tamper-proof provenance and instant credential verification, removing manual paperwork and intermediaries

Figma Finance Tracker App Prototype

Oct 2025 to Nov 2025

Prototype Developer

- Designed and prototyped a youth finance-tracker app in Figma to address the lack of allowance and spending tools for students
- Built an in-app AI chatbot feature to educate users on saving habits, applying AI to make financial literacy more accessible
- Consolidated allowance, categorised expenses and savings into a single, intuitive view for clearer money management
- Validated the design through user feedback, with users reporting a clearer understanding of their spending and saving behaviour

World Robotics Olympiad Competition (Personal)

Feb 2025 to Dec 2025

EVO Tester and Robot Builder

- Self-learned EVO, a newly released open robotics platform, and competed with it at WRO 2025
- Programmed the ESP32-based robot in the Arduino IDE (C/C++), integrating EV3 motors and sensors for autonomous mission-solving
- Designed and iterated a mission-solving robot using LEGO and custom 3D-printed parts; placed 2nd Runner-Up (Senior Category)

Chan-Brothers Tourism-Fluctuations Dashboard

Apr 2025 to Aug 2025

Tableau Dashboard Developer

- Built an interactive Tableau dashboard analysing how recessions and economic events affect outbound tourism for Chan Brothers
- Implemented filtering and trend-analysis controls with guided navigation, translating user needs into clear, self-service insights
- Consolidated multiple datasets into one dashboard, reducing manual comparison work and improving analysis efficiency
- Integrated individual team dashboards into one finalised deliverable presented to the lecturer

GSM Gaming Digital Store

Nov 2024 to Mar 2025

Backend Dashboard Developer

- Developed an admin analytics dashboard for a gaming digital store using object-oriented Python with HTML and CSS
- Built data visualisations surfacing the top 5 best- and least-selling products to support inventory and sales decisions
- Implemented one-click export of charts and dashboards to image, automating a previously manual reporting step

WORK EXPERIENCE

School of Robotics

Sept 2024 to Present

Part-time Teacher and Competition Trainer

- Conducted weekly hands-on classes for primary school students (ages 8–10) using LEGO Spike Prime
- Taught core robotics concepts including mechanical design and programming logic
- Coached students (ages 9–11) for national robotics competitions such as WRO and FLL
- Guided students through teamwork, innovation, and problem-solving under timed scenarios

World Robotics Olympiad/Space Faculty

Aug 2024 to Sept 2024

Competition Core Member and Chief Judge

- Coordinating with robotics competition event team on competition rules, procedures and side quest grading
- Managing judges under my category and ensuring fair and fun competition
- Setting up and tearing down competition

CERTIFICATIONS & AWARDS

- Foundations of Digital Marketing & E-commerce | Attract and Engage Customers with Digital Marketing
- Director List: Year 1 Semester 1 (2024)
- Edusave Awards: Eagles Award (2019, 2022, 2023), Merit Bursary (2020), Scholarship (2021, 2022, 2023), Academic Achievement (2025)
- Robotics Awards: 2nd Runner Up WRO Robomission Senior Category (2025), Participation in International Finals (2025)

CO-CURRICULAR ACTIVITIES

Urban Strength Club

May 2024 to Present

Calisthenics Trainer

- Planned and executed a training orientation for Freshmen to pick up and try calisthenics
- Formulated initiatives to guide and train freshies and regular club members on calisthenics skills and spread the joy of training

School of Information Technology (SIT) Club

May 2024 to Jan 2025

Subcommittee Member in Publicity

- Contributed and executed IT events for the school in events (e.g SIT Day, Open House, EAE Open House)
- Actively promote SIT during Open House & EAE Open House as part of ushers and play as photographer for publicity team

ADSS Robotics Club

Jan 2022 to April 2023

President

- Led and managed the whole club with a group of devoted ExcOs and teachers to uphold the club's standard and welfare.
- Guided and inspired following batches on aspects of robotics and even adopt skills and learning lessons to their own lives

ADDITIONAL INFORMATION

- Passionate about applying technology to create value in the financial industry, with a long-term interest in entrepreneurship
- Fluent in English (spoken & written) and Mandarin (spoken)
- Enjoys Calisthenics
- Actively explores new productivity and AI tools (e.g. Notion, Claude, Base44) to build and work more effectively
